HON. COMMISSIONER OF PATENTS AND TRADEMARKS
P.O.Box 1450
Alexandria, VA 22313-1450

TRANSMITTAL LETTER

Dear Sir:

Transmitted herewith, for filing in connection with the Patent Application of

Inventor:	AMAD (NMN) TAYEBI
For:	A Postable Sticker
Serial Number:	09/253,174
Filed:	February 19, 1999
Group Art Unit:	1772
Examiner:	Ahmad, Nasser

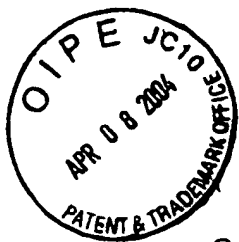

are the following:

- 1- Reply Brief, in triplicate.
- 2- Return Post Card

Respectfully submitted

Amad Tayebi
Registration No. 46,461

5 Sequoia Rd. Westford, MA 01886
Dated: April 9, 2004

EXPRESS MAILING CERTIFICATE

Commissioner of Patents and Trademarks
P.O.Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Mailing label number: **ET765617887US**

Date of Deposit: **April 9, 2004**

I hereby certify that the attached Reply Brief, dated April 9, 2004 and filed in connection with the Patent Application for **A Postable Sticker**, invented by me is being deposited with the United States Postal Service per "Express mail post office box to addressee" service under 37 CFR 1.10 on the date indicated above and is addressed to the Commissioner of Patents and Trademarks, P.O.Box 1450, Alexandria, VA 22313-1450 .

Name and address of person making deposit:

Amad Tayebi, 5 Sequoia Road, Westford, MA 01886
Registration No. 46,461

Signature: *Amad Tayebi*

Attached:

- 1- Reply Brief, in triplicate.
- 2- Return Post Card

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES**

In Re Appln. of: Amad Tayebi

Serial No.: 09/253,174

This is a Continuation Application of Serial No. 08/828,878 filed on March 31, 1997 which issued as U.S. Patent No. 5,989,667 on November 23, 1999.

Filed: February 19, 1999

For: A Postable Sticker

Group: 1772

Examiner: Ahmad, Nasser

**Reply Brief and Amendment in Response to Examiner's Answer Dated
February 12, 2004**

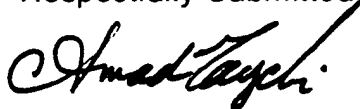

Applicant hereby submits the following Reply Brief and Amendment in response to
Examiner's Answer dated February 12, 2004.

**APPELLANT'S REPLY BRIEF AND AMENDMENT IN RESPONSE TO
EXAMINER'S ANSWER**

1. Applicant acknowledges, with appreciation, Examiner's Answer dated February 12, 2004.
2. Applicant hereby re-affirms that he has no related appeals and/or interferences which will directly affect or be directly affected by or have a bearing on the decision in the pending appeal contained in the brief.

3. Applicant acknowledges, with appreciation, Examiner's withdrawal of the Obviousness rejections of claims 13, 15 and 19 under 35 U.S.C. 103 (a).
4. Applicant acknowledges, with appreciation, Examiner's entry of the amendment after final rejection.
5. In his Response to Argument, affirming his rejection of claims 13, 15 and 19 as anticipated by Madole (5,299,833) under 35 U.S.C. 102 (b), Examiner deemed applicant's appeal Argument as being not persuasive because "the phrase "non-destructive adhesive" could not be located in the instant claims 13 and 15 as alleged by the applicant." Further, Examiner pointed out that "Appellant should note that the claimed invention is directed to a sheet and not a stack," Examiner also pointed out that "the open-ended claim language could provide for the presence of additional elements/limitations such as non-adhesive area above the adhesive first area or the presence of a stack."
6. In response to Examiner's affirmation of his rejection of claims 13, 15 and 19, applicant has re-amended claims 13, 15, and 19 to incorporate additional claim elements/limitations, the absence of which constituted the grounds for Examiner's affirmation of his rejection of claims 13, 15 and 19 under 35 U.S.C. 102 (b). All elements/limitations added to the claims have support in the application, as filed, as follows:
 - (a) "A plurality of postable stickers assembled in a multi-layer stack form", please see application, as filed, page 3, lines 5 and 6, page 5, lines 23 and 24 and page 6, line 5.
 - (b) "non-destructive adhesive", please see application as filed, page 3, line 1.
7. Re-amended claims 13, 15 and 19 are attached, please see Appendix A. Applicant hereby respectfully requests Examiner's consideration and allowance of re-amended claims 13, 15 and 19 in light of applicant's incorporation of additional claim elements/limitations, the absence of which constituted the grounds for Examiner's affirmation of his rejection of claims 13, 15 and 19 under 35 U.S.C. 102 (b).

Respectfully Submitted

A handwritten signature in black ink, appearing to read "Amad Tayebi". The signature is fluid and cursive, with a long horizontal stroke extending from the end.

APPENDIX (A)

Amended Claims

Claim 13 (four times-amended):

A plurality of postable stickers assembled in a multi-layer stack form, each of said postable stickers [A temporary posting adhesive-coated sticker capable of being temporarily attached to an application surface,] comprising:

a sheet of opaque flexible material, said sheet having a perimeter defined by two parallel side edges, a top edge and a bottom edge, said sheet having at least one first area and at least one second area; said first area extending to said top edge of said perimeter and extending from one of said parallel side edges to the other of said parallel side edges and being completely and continuously coated with a non-destructive pressure sensitive adhesive coating; said second area being located immediately adjacent to said first area and being substantially free from said non-destructive adhesive coating and providing a memo writing space; said non-destructive adhesive coating being of a temporary adhesion nature such that when said sticker is attached to and subsequently peeled off [said] an application surface, said non-destructive pressure sensitive adhesive coating remains on said first area of each of said stickers and said application surface suffers no damage; and,

at least one weakened tear line, selected from the group consisting of pre-slit cut lines, perforated lines and microperforated lines, wherein said weakened tear line being of such a shape and location that it substantially separates said at least one first area from said at least one second area and wherein said weakened tear line providing a low tear strength that directs an initial tear, started at one of the parallel side edges of said perimeter, to propagate along its path by offering lower resistance to tear against an applied tear force.

Claim 15 (four times amended):

A plurality of postable stickers assembled in a multi-layer stack form, each of said postable stickers [A temporary posting adhesive-coated sticker capable of being temporarily attached to an application surface,] comprising:

a sheet of opaque flexible material, said sheet having a perimeter defined by two parallel side edges, a top edge and a bottom edge, said

sheet having at least one first area and at least one second area; said first area extending to said top edge of said perimeter and extending from one of said parallel side edges to the other of said parallel side edges and being completely and continuously coated with a non-destructive pressure sensitive adhesive coating; said second area being located immediately adjacent to said first area and being substantially free from said non-destructive adhesive coating and providing a memo writing space; said non-destructive adhesive coating being of a temporary adhesion nature such that when said sticker is attached to and subsequently peeled off [said] an application surface, said non-destructive pressure sensitive adhesive coating remains on said first area of each of said stickers and said application surface suffers no damage; and,

at least one weakened tear line, selected from the group consisting of pre-slit cut lines, perforated lines and microperforated lines, wherein said weakened tear line extends from one of said parallel side edges to the other of said parallel side edges and is located, in its entirety, within said at least one second area and wherein said weakened tear line providing a low tear strength that directs an initial tear, started at either end of said weakened tear line, to propagate along the path of said weakened tear line by offering lower resistance to tear against an applied tear force

Claim 19 (once-amended):

A plurality of postable stickers assembled in a multi-layer stack form, each of said postable stickers [A temporary posting adhesive-coated sticker capable of being temporarily attached to an application surface,] comprising:

a sheet of opaque flexible material, said sheet having a perimeter defined by two parallel side edges, a top edge and a bottom edge, said sheet having at least one first area and at least one second area; said first area extending to said top edge of said sheet perimeter and extending from one of said parallel side edges to the other of said parallel side edges and being at least partially coated with [an] a non-destructive adhesive coating; said second area being located immediately adjacent to said first area and being substantially free from said non-destructive adhesive coating and providing a memo writing space; said non-destructive adhesive coating being of a temporary adhesion nature such that when said sticker is attached to and subsequently peeled off an [said] application surface, said non-destructive adhesive coating

remains on said first area of each of said stickers and said application surface suffers no damage; and,

at least one weakened tear line, selected from the group consisting of pre-slit cut lines, perforated lines and microperforated lines, wherein said weakened tear line extends from said top edge to said bottom edge and wherein said weakened tear line providing a low tear strength that directs an initial tear, started at either end of said weakened tear line, to propagate along the path of said weakened tear line by offering lower resistance to tear against an applied tear force.
